

Anja Mustać

PORTFOLIO

Hello!

My name is Anja and I'm a Media Studies and Library Science graduate from Rijeka, Croatia. I enjoy being creative in the digital environment, exploring the possibilities and learning new things.

I have been doing mainly web-design but have also done some app design work. My experience includes designing in Figma and developing web apps using Javascript libraries and frameworks like ReactJS or Angular. I also really love writing, researching stuff and playing guitar.

My main project is called [... tastes like strawberries](#) and it is a website which I use as a platform to practice design and coding, share my portfolio and express myself.

My goal is to create beautiful yet functional designs, to learn and get inspired.

Flowbook

Stay organized and keep yourself updated.

• design for a sticky notes web application

'flowbook App'

April 2021.

• design for a sticky notes web application

'pretty puzzled'

March 2021.

• chic/springy website design for a fictional brand

'licitar heart'

March 2021.

• design for the traditional heart-shaped Licitar (Croatian heritage symbol)

'bubbly App'

February 2021.

• my take on creating a girly android app

• the idea of the app is sharing experiences and reviews of different products like cosmetics, books, clothes etc.

• design practice: keyboard, messenger

'rollerskates'

February 2021.

• my attempt at making a clean, usable design with a recognizable look in both web and app version

'... tastes like strawberries'

December 2020.

• personal website
