

Anja Mustać

PORTFOLIO

Hello!

My name is Anja and I'm a Media Studies and Library Science graduate from Rijeka, Croatia. I enjoy being creative in the digital environment, exploring the possibilities and learning new things.

I have been doing mainly web-design but have also done some app design work. My experience includes designing in Figma, creating websites with HTML & CSS and I'm currently learning Javascript and React, together with the basics of back-end development.

I also really love writing.

My main project is called [... tastes like strawberries](#) and it is a website which I use as a platform to practice design and coding, share my portfolio and express myself.

My goal is to create beautiful yet functional designs, to learn and get inspired.

You can find more about me and how I got into design and coding [here](#).

Flowbook

Stay organized and keep yourself updated.

• design for a sticky notes web application

'flowbook App'

April 2021.

• design for a sticky notes web application

'pretty puzzled'

March 2021.

• chic/springy website design for a fictional brand

'licitar heart'

March 2021.

• design for the traditional heart-shaped Licitar (Croatian heritage symbol)

'.happier App'

February 2021.

• my first attempt at designing an android app

• the idea is an app that serves as your happy place

• you can build collections of music, images, docs and share with friends/community

'bubbly App'

February 2021.

• my take on creating a girly android app

• the idea of the app is sharing experiences and reviews of different products like cosmetics, books, clothes etc.

• design practice: keyboard, messenger

'... tastes like strawberries'

December 2020.

• personal website

'monochrome particles'

November 2020.

• layout done with HTML, CSS and Javascript

• the goal was to create a clean design and practice coding
